No clips
required!

INSULATED CONCRETE FORM BENEFITS

INSULATED CONCRETE FORM

EXTREME ENERGY EFFICIENCY

30-70% savings on energy costs

QUIET AND COMFORTABLE

ITS 50+ 3 times more soundproof than wood

INCOMPARABLE FIRE PROTECTION

More than 3-hour fire rating

ANTI-MOLD STRUCTURE

EPS does not proliferate mold

INSULATED CONCRETE FORM

BUILDBLOCK FORMWORK BENEFITS

INSULATED CONCRETE FORM

FULLY REVERSIBLE BLOCKS

FULLY ASSEMBLED BLOCKS

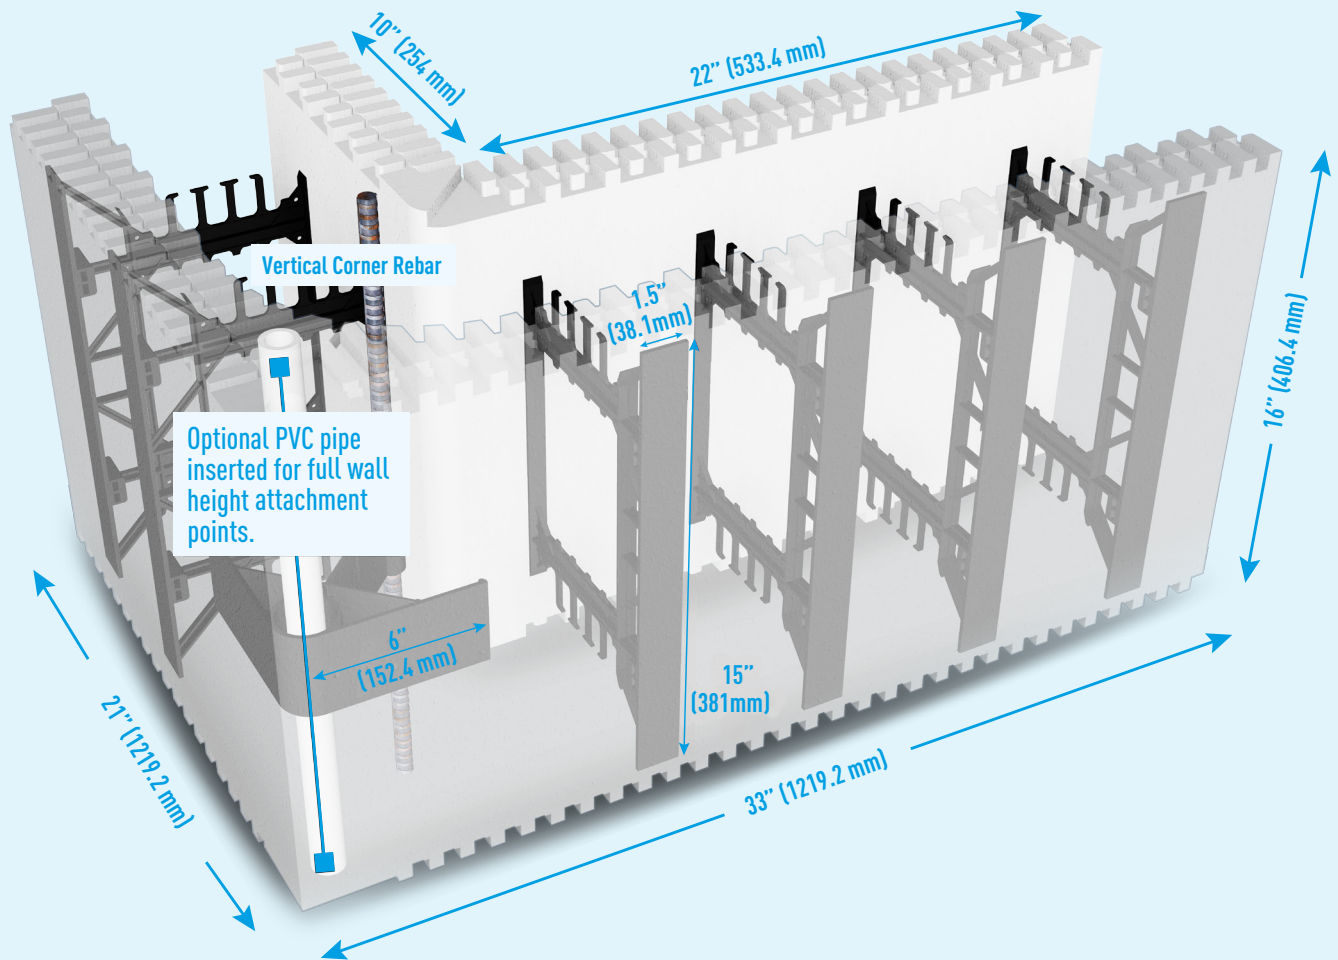

INDUSTRY STANDARD SIZE

16" tall X 48" long

TIGHTEST INTERLOCKING BLOCKS

For greater stability and precise alignment

BUILDBLOCK™ | MANUFACTURED BY STYRORAIL

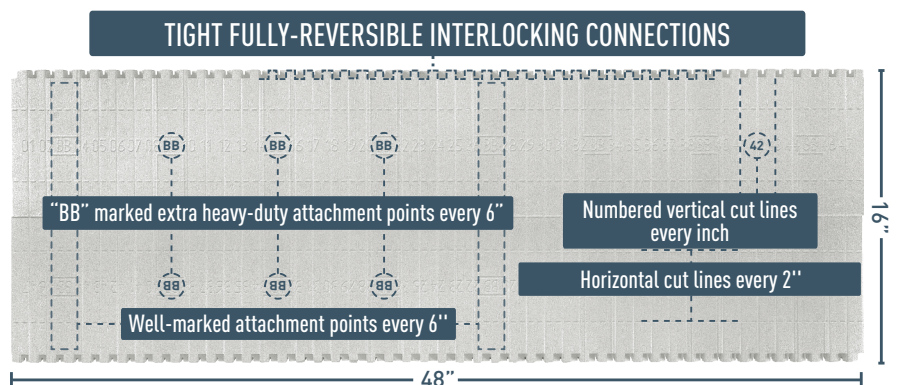

BEST CORNER ON THE MARKET

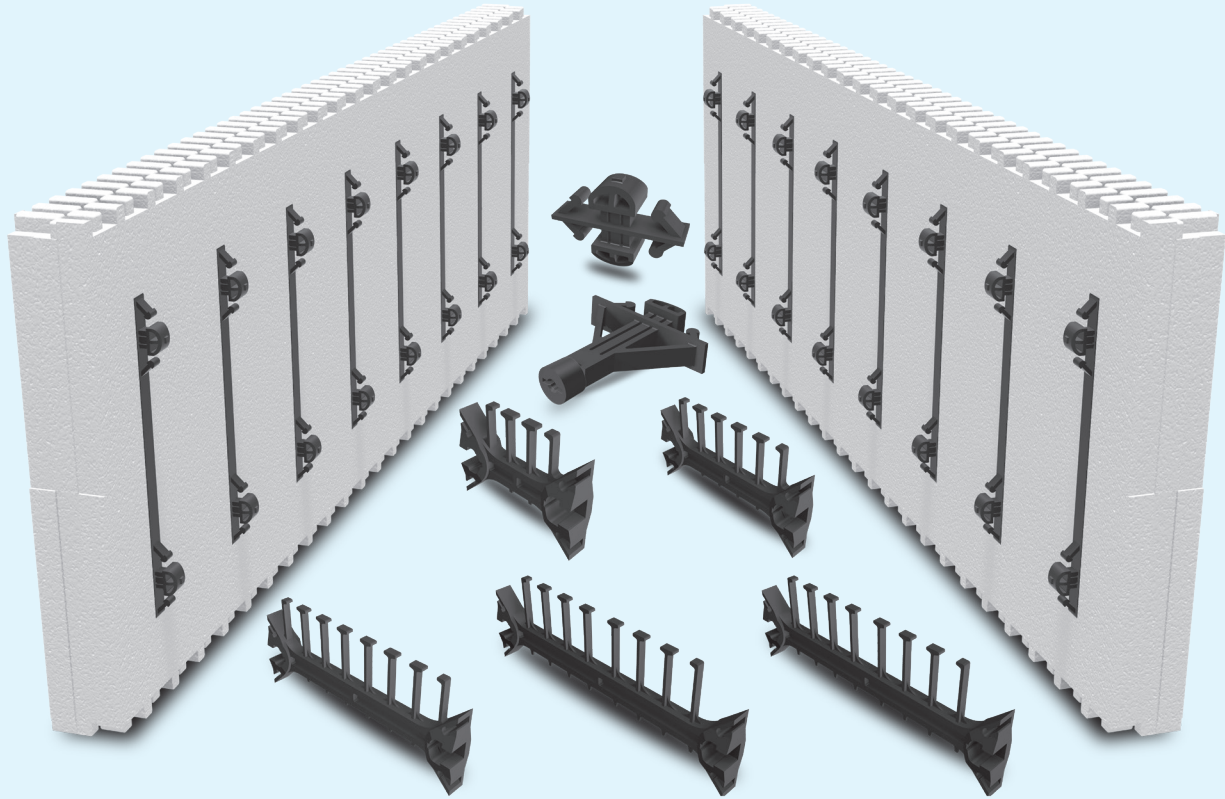

INSULATED CONCRETE FORM

Fastening strips supporting more load every 6 in., even in the corners. Facilitates attachment and resistance during the concrete pour.

Vertical cut lines every 1" (25 mm) and horizontal every 2" (50 mm)

"BB" marked extra heavy duty 450 lbs attachment points every 6" (152 mm)

BUILDBLOCK™ KNOCKDOWN INSULATED CONCRETE FORMS

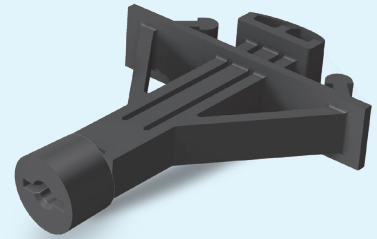

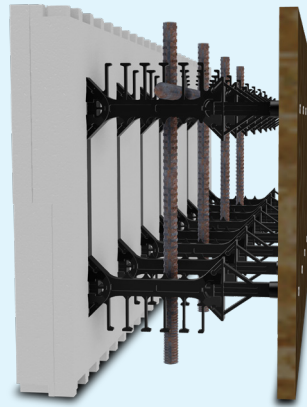

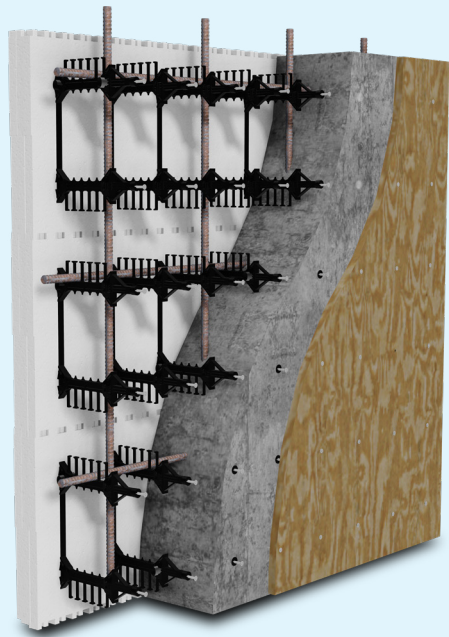

INSULATED CONCRETE FORM

Maximize savings on shipping space

Ideal for very wide walls such as pillars or footings up to 24" (610 mm)

Easily integrates with standard BuildBlock blocks

Makes inventory management more efficient for contractors in remote areas

HARDWALL™ ICF CONCRETE FACED WALLS

INSULATED CONCRETE FORM

Create an insulated ICF wall on one side and a bare concrete wall on the other in a single step

.....

Perfect for stairwells and elevator shafts

.....

Hardwall™ Connector provides attachment points for wood and its removal after concrete pouring

.....

Possibility of adding several layers of insulation between the concrete and the insulation to meet the highest R-value standards

Durable Construction and energy efficient

BUILD FOR LIFE WITH
HIGH ENERGY EFFICIENCY
