

# SR.SILVERCLAD™

GRAPHITE EXPANDED POLYSTYRENE RIGID INSULATION  
COMBINED TO A PERFORATED REFLECTIVE MEMBRANE

The SR.Silverclad™ boards manufactured by Styro Rail Inc. are composed of type 1 Graphite expanded polystyrene rigid insulation [EPS] laminated to a perforated reflective membrane with a reflectivity rate of 83% on both sides.

## CHARACTERISTICS

HIGHER INSULATING VALUE PER INCH

CONTINUOUS INSULATION - ELIMINATING THERMAL BRIDGES

ACTS AS A WHEATHER BARRIER WHEN THE JOINTS ARE SEALED

NON VAPOUR BARRIER : THE MICRO PERFORATED MEMBRANE ALLOWS THE WALL TO BREATHE

MEETS CAN/ULC-S701.1 STANDARD

## ENVIRONMENTAL DATA

The expanded polystyrene used in the making of the **SR.Silverclad™** boards are composed of 98% air and 2% plastic material. They are manufactured without HCFC, HFC gases and without HBCD flame retardant.

The STYRORAIL™ products can contribute to LEED credits.

Please send us your LEED Material Declaration Form at [projetleed@styorail.ca](mailto:projetleed@styorail.ca).

## STORAGE

Store **SR.Silverclad™** boards in a dry and ventilated location, protected from the outside elements, ultraviolet rays, open flames or other sources of ignition. Stack boards on pallets of minimum 100 mm [4"] over the ground.

Cover the unwrapped **SR.Silverclad™** boards or if packaging has been damaged with an **opaque** white tarp. An excessive heat accumulation can deform products made with graphite polystyrene.

Do not store the **SR.Silverclad™** boards near any reflectives surfaces [ex: glass, metal]. A heat concentration from reflected sunlight can deform products made with graphite polystyrene.

## INSTALLATION

Boards must be dry and in good condition before installation.

Avoid the prolonged exposure to sunlight of the **SR.Silverclad™** grey/black surface. Avoid the concentration of sunlight rays from radiation. Cover as soon as possible on hot days and/or during non-windy conditions. An excessive heat accumulation can deform products made with graphite polystyrene.

Refer to the *Installation Guide* for more information.

## LIMITATIONS

Expanded polystyrene is combustible. Even if expanded polystyrene contains a flame retardant, limit use of open flame or ignition sources near product. A protective barrier or thermal barrier is required as specified in the appropriate building code.

Expanded polystyrene may be affected by some oil based solvents.

An excessive heat accumulation can deform products made with graphite polystyrene.
